# Vision gives all members of the team the complete picture:

## Is the team working where expected?

Patented GPS-based geo-fencing technology confirms field call locations and the time spent at each visit. You know visits and operational processes are happening where and when expected.

## Visibility to achievement to goal

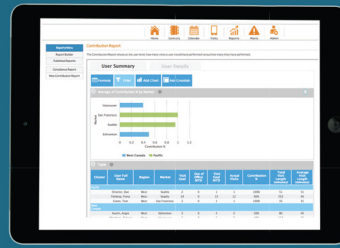

directly within the app, combined with key proprietary metrics, enables field team members to know exactly where locations stand and how to focus their time on those things that will impact what's important to the business.

**Real-time dynamic reporting** with photos allows team members to focus on the business rather than manually filling out paperwork. The vital data needed to drive your business forward is always at your fingertips.

**Automated escalation** routing ensures key personnel are notified of red flag issues so they can be addressed immediately.

**The Vision mobile app** is available for iOS and Android tablets and phones for easy compatibility and flexible deployment.

**Vision** offers an excellent user experience across all devices.

## Seeing is Believing!

Field reps of a major client saved an average of 7 hours per week by deploying Vision by Mobile Insight, yielding a 10% increase in productivity and a cost savings of \$1 million!

For another customer, Vision by Mobile Insight yielded a direct 700% return on investment!

**Vision by Mobile Insight** is the real-time link between corporate and the field.

Analyze data against key metrics instantly to make more effective decisions regarding field and organization operations.

**MOBILE INSIGHT**®
